Differential Temperature Controls

Automatic control for solar water and space heating systems, residential or commercial.

Types of systems: Open-loop direct water circulation (freeze recirculation option); closed-loop glycol and drainback systems. DTT operate on 10K Ohm.

Sensors not included. Add 2 SAS-10 to each DTT control (install on collector hot out and storage cold locations).

Both are needed to start pump circulation. Additional functions of the sensors are: freeze recirculation in direct systems (collector sensor), upper limit option (storage sensor).

DTT-84, 115V (to be hardwired) \$119.00

DTT-94, 115V (with electrical cord and pump plug) \$133.00

DTT-84, 230V (to be hardwired) \$141.50

DTT-84, 12V DC \$147.00

Sensors

SAS-10 10KOHM (use 2 for DTT-84 and DTT-94 above), ea. \$12.50

S-WIRE Sensor wire, stranded vinyl jacketed, 2 lead \$30.00 /100 ft.

Pool and Spa Controls

LX 220/2TX Compool diff. control with positive sealing valve & operator, sensors included. \$397.00

Use for open loop drainback solar pool heating, new or replacement

LX 220/B Compool diff. control, sensors and addit. relay \$293.00

Use for closed-loop and booster pump solar pool heating and spa heating systems, new or replacement

Repair Items for Draindown Sunspool / HG Spool Valve

Check valve repair kit: HG/CV: springs, ball, O-ring \$15.00

O-rings for Shaft: HG/ORING kit: Static and dynamic O-rings, lubricant \$30.00

Factory Installation of O-rings, send RDU cartridge \$65.00

Prices are quoted f.o.b. Richmond, Ca. and may change without prior notification. Credit cards welcome.
